

Garage Door Insulation 10m x 0,60m

Winter / Summer

- Bubble wrap insulation roll, triple layer for garage doors, radiators, roller shutter boxes, etc.
- Heat reflector insulation
- Easy to install, adapts to different surfaces and can be easily cut.
- One roll is enough for a garage door up to 6m².
- Reduce heat loss in winter and keep cool in summer: save energy and waste less.

Technical Description

- Dimensions: 10m roll x 60cm high, insulation thickness 4mm
- Material: triple layer: 1 layer of 150-micron bubble film (bubble diameter 10mm and height 4mm) sandwiched between 2 reflective aluminum PET surfaces (12 microns).
- Weight: 1 kg
- Insulation coefficient: R 0.14 m²K/W

For comparison, 10 cm thick fiberglass offers an R of 2.22 m²K/W. By applying a 4mm thick layer of fiberglass (like our Art. B513V), the R achieved is 0.09 m²K/W. Additionally, our product, unlike fiberglass, has a reflective surface that reduces heat loss through radiation.
